-----  
How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe - and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

How many dumping and import taxes are imposed on solar PV?

Since 2011, the number of antidumping, countervailing and import duties levied against parts of the solar PV supply chain has increased from just 1 import tax to 16 duties and import taxes, with 8 additional policies under consideration. Altogether, these measures cover 15% of global demand outside of China. IEA. Licence: CC BY 4.0

How much is PV trade worth in 2021?

The total value of global PV-related trade - including polysilicon, wafers, cells and modules - exceeded USD 40 billion in 2021, an increase of over 70% from 2020. IEA. Licence: CC BY 4.0 IEA. Licence: CC BY 4.0

In FY2024, India exported over 5.8 GW of PV modules, which was at least three times higher than in FY2023. The nation exported more ...

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of

destination.

The U.S. remained the top buyer of Indian solar products in Q2 2023, accounting for 98.5% of total solar exports. The U.S. ...

Explore Afghanistan solar panel manufacturing with market analysis, production statistics, and insights on capacity, costs, and industry growth ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

Explore Afghanistan solar panel manufacturing with market analysis, production statistics, and insights on capacity, costs, and industry growth trends.

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis.

KABUL (SW) - The de-facto Ministry of Industry and Commerce (MoIC) has reported a 10% decrease in Afghanistan's exports over the earliest five months of the current ...

InfoLink's customs data shows that China exported about 23.38 GW of PV modules in March 2025, up 44% MoM but down 5% YoY from 24.51 GW. China's total module exports ...

Source and disposition of photovoltaic module shipments U.S. shipments and sales to the original equipment manufacturer (OEM) for resale and export shipments are not published for certain ...

Indicators of renewable resource potential Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity ...

Indian PV module exports surged to \$2B in 2024, driven by US tariffs on Chinese imports and global demand. Learn how India is reshaping the photovoltaic market.

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m<sup>2</sup>)

The National Statistics and Information Authority has announced that Afghanistan exported goods worth over \$667 million in the first six months of the current solar year. ...
