What is an IP55 rating in outdoor cabinets?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water.

What is an IP55 rating?

The correct IP classification directly affects the stable operation of installed equipment. One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.

Is IP55 safe for outdoor use?

In summary, equipment with an IP55 security rating is designed to be resistant to the entry of dust and water jets from any direction. Making it suitable for use in environments where these conditions may be encountered, such as outdoors or in wet industrial environments. Is IP55 suitable for outdoor use?

What is the IP rating on a cabinet?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water. The IP55 marking includes two digits that determine the nature and intensity of the enclosure's protection against external influences.
