-----

Discover how next-gen battery technologies like solid-state, sodium-ion, and flow batteries are revolutionizing solar energy storage, making solar power more reliable, scalable, ...

A flow battery membrane makeover is expected to cut costs and improve the environmental footprint of long duration energy storage.

Flow batteries are emerging as a lucrative option that can overcome many of lithium-ion's shortcomings and address unmet needs in the critical mid- to ...

LONDON: US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained ...

Flow batteries will become more attractive for energy storage as power generation moves away from combustion-based technology. In ...

Here are our recommendations for finding a home solar battery system that fits your needs. If you live in an average house with natural gas heat and ...

Zinc-based flow batteries exhibit application prospects for distributed energy storage, which have been in the stage of pilot scale-up and need to further improve their ...

China has just switched on the world's largest vanadium flow battery showcasing its gigawatt-hour-scale flow battery technology.

Sumitomo Electric has inaugurated a vanadium redox flow battery (VRFB) system at a community solar

microgrid in southern Japan.

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of ...

This week, U.S. energy officials uncovered a troubling discovery: undisclosed communication devices embedded in Chinese-made solar power inverters and batteries, ...

In May 2025, Sichuan Changhong Electric Power Co., Ltd. launched a new generation of commercial energy storage cabinets designed to provide global commercial ...

For wind and solar power generation, the main electrochemical storage technologies encompass lithium-ion, flow, lead-carbon, and sodium-ion batteries. Vanadium ...

As global renewable integration reaches critical mass, Chinese flow battery technology has emerged as a cornerstone solution. But how does this electrochemistry innovation address the ...

In May 2025, Sichuan Changhong Electric Power Co., Ltd. launched a new generation of commercial energy storage cabinets ...

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage.
