Does Australia have a battery energy storage subsidy?

According to the Department of Energy's official guide, Australians can access a wide range of battery energy storage subsidy programs at both federal and state levels in 2025. What Is the Battery Energy Storage Subsidy?

How will Australian government fund solar batteries?

The Australian Government will fully fund the discount for solar batteries by purchasing small-scale technology certificates (STCs). This means no costs will be passed on to householders through energy retailers. Household batteries will assist in balancing electricity supply and demand across the whole grid.

Would a battery scheme benefit Australia?

AMBC says a battery scheme would provide higher incentives for Australian manufactured batteries over imports, scale with domestic manufacturing capability ensuring sustainable industry growth, and cover residential, commercial, industrial, fringe-grid and off grid solar batteries.

What is the NT battery subsidy?

National battery subsidy - a federal battery rebate is available, reducing the cost of installing a battery by around 30%. There was an NT battery subsidy but it ended early June 2025. There was a Home and Business battery scheme that offered grants for batteries, but it ended June 4, 2025.
