-----  
What projects are being planned in Oman?

Additional projects have been announced, including 2.1 GW for PV, 400 MW for Wind, and 600 MW for CSP. Green hydrogen developments (Table 13) in Oman are being orchestrated by Hydrom, with an initial aim of meeting a production target of 1-1.25 Mtpa of green hydrogen by 2030/26.

Which pilot projects are operational in the MENA region?

Currently, in the MENA region only a few pilot projects are operational: o 8DEWA Green Hydrogen Pilot 1 Plant in UAE that utilizes 1.25 PEM electrolyser o Egypt Green (Phase 1) project in Egypt developed by Fertiglobe and Scatec<sup>9</sup>

How much renewable capacity will be installed in 2030?

As a starting point, it is useful to analyse the current pipeline of projects in the region (Figure 6). If all projects under construction, under development and announced will be successfully realized, the total renewable capacity installed in 2030 would reach 131 GW.

How many solar projects are there in Uzbekistan?

These projects include the 445MW Bilasuvar Solar PV, the 315MW Neftchala Solar PV, and the 240MW Absheron- Garadagh onshore wind Project. Uzbekistan has a current installed capacity of over 2.7 GW, mostly from hydropower, with solar and wind projects accounting only for 250 MW.

The four upcoming energy storage projects, all identical in scale, are strategically located within Saudi Arabia. As part of the Saudi Vision 2030 policy, the country aims to ...

Beirut's energy crisis has reached a critical point, with power shortages costing Lebanon 4-6% of its GDP annually according to 2024 World Bank estimates. But here's the thing - the newly ...
