How many solar installations are there in Brussels in 2023?

The energy regulator in Brussels indicates that the capital recorded 7 MW of solar installations in the first half, down from 23.6 MW for all of 2023. Analysts told pv magazine that, while the residential segment (<5 kVA) remains stable, the small and medium segment (5-100 kVA) has slowed.

How to share energy in Brussels?

There are three ways to share energy in Brussels: Peer-to-peer, in the same building or via energy communities. An overview of what you need to do and who to contact to set up your own local electricity production installation. If you have solar panels or domestic batteries, you must declare them to Sibelga.

How can we make the energy transition in Brussels possible?

Green energy production is on the rise. You too can take the step towards producing green energy. This is a necessary step to make the energy transition in Brussels possible. We can help you as a partner in your self-generation projects. Solar panels are a cost-effective way to produce your own energy.

What is Invictus-Antwerpen solar PV Park?

Invictus-Antwerpen Solar PV Park is a 40MW solar PV power project commissioned in December 2009. It is located in Antwerp, Belgium. In October 2009, the city of Antwerp announced that they planned to install 2,500 m² of solar panels on roofs of public buildings, that would generate 265 MWh per annum.

The real reason 90% of solar projects run into delays (it's not what you think): Most people blame: - The weather - Components - Supply chain - Installation team But after 16 ...
