Why do we need energy storage solutions in Bulgaria?

Establish a reliable energy system with greater share of intermittent generation. In the context of Bulgaria's energy landscape, energy storage solutions present a diverse array of benefits to various stakeholders stemming from its unique ability to time-shift energy and rapidly respond when called upon. The applic

Can battery-based energy storage improve peaking capacity in Bulgaria?

Storage can also offer greater flexibility and efficiency in managing the grid. Furthermore, and although hydropower storage already makes up a significant source of peaking capacity in Bulgaria, battery-based energy storage can address peaking needs during times of droughts, meet requirements for more distributed peaking po

What is Bulgarian Energy Holding (BEH)?

Bulgarian Energy Holding (BEH) is the holding company for a group of companies which are principally engaged in electricity generation, supply and transmission, natural gas transmission, supply and storage and coal mining.

Which hydro power plants produce electricity in Bulgaria?

The main electricity generation is provided by hydro power plants grouped in four hydro power cascades: Belmeken - Sestrimo - Chaira Hydro Power Complex, Batak Cascade, Dospat-Vacha Cascade and Arda Cascade. NEK EAD is a major player in the electricity market of Bulgaria guaranteeing security of supplies.

Source: ENTSO-E In Bulgaria, there are 242 hydropower plants in operation. In total, the National Electricity Company (NEK) owns 30 conventional hydro ...

Bulgarian state-owned power utility, the National Electricity Company (NEK), plans to install a 10 MWh battery energy storage system (BESS) at its recently reconstructed Vacha ...
