How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.

How much will PV modules cost in 2025?

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W (US\$0.1/W), and some modules priced as high as RMB0.75/W (US\$0.11/W).

How big is China's operational module capacity?

CEA said that China currently has 1,040 GW of operational module capacity, up from 996 GW at the end of 2024 but below its 2025 outlook of 1,218 GW.

Do tariffs thwart electricity supply in Africa?

Tariffs have thwarted them somewhat in the United States and Europe, but they're finding enormous new markets in Africa, where around 600 million people lack reliable electricity.

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. China: According to the OPIS ...

In 2019, even though China's photovoltaic installed capacity dropped again, the newly added and accumulated photovoltaic installed capacity continued to rank first in the world.

China is supplying low cost solar panels to many African nations, including South Africa. Doing so also increases its political power.

This marks the first increase in FOB China module prices, following upstream price gains that began in the first week of July amid government intervention. Forward prices rose ...

Excess capacity has sent solar panel prices tumbling. In the early 2010s, the stretch goal was to get the cost down to 50c a watt. Now ...

The prices of made-in-China panels are by far the lowest in the world. South Africa's rapid pivot to Chinese solar gear, as affordable as it is, also doesn't resolve a basic ...

Discover data on Photovoltaic: Price in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

China's solar PV module manufacturers focus on domestic market in 1H25, with some reducing low-price overseas orders The surge in installations may cause phased ...

It was a bumpy year for the PV industry in 2021. While experiencing polysilicon price surge, China's energy intensity control, and dramatic supply chain prices fluctuation, global ...

The immediate driver of this surge is the historic collapse in solar module prices. China has become the undisputed powerhouse of global panel production, churning out over ...

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several ...

In a new weekly update for [pv magazine](#), OPIS, a Dow Jones company, reports that TOPCon modules from China held ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

Prices for Chinese project will be prices for TOPCon modules instead of PERC from April 2024 onwards. InfoLink Consulting provides weekly updates on PV spot prices, covering module ...

With Chinese solar giant JinkoSolar having warned customers about rising PV panel prices last month, pv magazine has spoken to two ...

CEA has predicted that solar module prices may increase from around \$0.8/W to \$10/W currently to \$0.11/W by the end of 2025 and likely up to \$0.13/W by 2027.
