How much does a data center rack cost?

Data Center Space - The floor space of a single rack can be as pricey as \$50 - \$200 per sq ft per year on rent or leasing costs. Power Consumption - The electricity consumption by the equipment placed in a full rack incurs an extra \$1000-\$10000 per annum in terms of power bills.

How important is a rack in a data center?

When it comes to the design of the data center the rack is an incredibly important component since it is the structure that houses and supports many of the servers, storage, and network equipment. The cost per single rack in the data center depends on a number of factors as follows:

What is a rack unit in a data center?

A rack unit (RU) measures 1.75 inches in height, and the standard height for full-sized racks in data centers is 42U. The number of servers and rack units required directly impacts data center pricing. For instance, a full rack, also known as a cabinet, provides dedicated space for secure equipment.

How much does it cost to power a data center?

In a data center with 100 cabinets, the cost to power those racks each year can be nearly \$3 million. As such, data center professionals need to ensure that they are properly monitoring energy consumption and efficiently managing capacity.
