Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m²)

Its ambitious goal for Croatia, to source all electricity from renewables by 2030, is based on a shift to solar and wind energy, as well ...

March 1 (SeeNews) - Croatian power transmission equipment maker Dalekovod [ZSE:DLKV-R-A] is ready to invest 200 million euro (\$276.7 million) in the construction of 100 megawatts of wind ...

Croatia is accelerating its focus on clean energy with a new round of auctions for solar, wind, and hydropower projects.

Let's explore how Croatia's energy storage projects are reshaping its power grid while creating opportunities for international investors and technology providers.

Croatia is a well-developed parliamentary democracy and became a member of the European Union (EU) on July 1, 2013. Facilities for tourism are available throughout the ...

This study analyzes the record electricity consumption in Croatia during the July 2024 heatwave and evaluates how the increased deployment of onshore wind and solar ...

From the Adriatic and islands to mountains and historic cities. Adventures and experiences that create memories for a lifetime!

In order to domestically produce such a quantity of electric energy, the country would need about 2,000 MW of solar power plants or an ...

This study analyzes the record electricity consumption in Croatia during the July 2024 heatwave and evaluates how the increased ...

Ramping up solar and wind to 5 GW and 4.2 GW, respectively, can help Croatia well achieve its 100% renewable energy ...

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations.

The long-awaited 117 MW Brda Umovi wind park near Split and the 150 MW Promina solar farm near Sibenik should receive energy approvals in the next two weeks, the Croatian economy ...

Leading Sub-Sectors Renewable Energy Croatia has significant potential for the use of renewable energy sources, including solar energy, wind energy, hydro energy, and ...

Croatia's journey toward 100% renewable energy relies on smart power generation and storage strategies. By combining solar/wind farms with cutting-edge ESS technologies, the country is ...

Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable Energy Sources of Croatia ...
