What is rack space rental (server colocation)?

Rack space rental, also known as server colocation, is the provisioning of a client's servers/computer equipment in a colocation provider's data center.

What is IP55 rated fully closed rack system?

IP55 rated fully closed rack system provides safe space for IT equipments, which is noise cancelling, thermal insulated, and dust proof. Special double layer transparent front door design prevents condensate and offers status indication of IT equipments.

What is rack rental hosting?

Rack Rental Hosting is a service that provides customers with dedicated space within a data center to house their own servers and IT equipment. The rented rack is exclusively for the client's use, offering a secure, controlled environment with reliable power, cooling, and high-speed connectivity.

Why should you rent a rack space in a data center?

Multiple Rent-a-Rack Space providers in India offer various hosting packages, but we are paramount. On most occasions, renting and allotting rack space in a data center is less costly than building a private data center and sticking to the maintenance and operational costs.
