What are solar energy ETFs?

Solar Energy ETFs invest in stocks of companies involved in providing goods and services exclusively to the solar energy industry. Click on the tabs below to see more information on Solar Energy ETFs, including historical performance, dividends, holdings, expense ratios, technical indicators, analysts reports and more.

Should you invest in solar ETFs?

If you want to expand your stocks in green companies and clean energy ETFs, solar ETFs are a good place to start. They're sure to grow in the coming years, so consider these long-term investments you are making for the future. Solar ETFs are likely to expand in the coming decades, and you'll see more of them pop up over time.

What is the Invesco solar ETF?

The Invesco Solar ETF focuses on companies in the solar energy industry. That includes companies that manufacture panels and electrical components and install solar energy systems. The ETF had almost 30 holdings as of late 2025, led by the following five:

Is solar energy UCITS a good ETF?

This ETF is for those excited about the future of solar power. Solar Energy UCITS is a European ETF solely focused on solar energy, focusing on companies and manufacturers who operate in the solar industry. This pure-play ETF is attractive for those who want to solely invest in solar energy and not other kinds of clean energy.
