Does Ethiopia have an electronic government procurement system?

The Government of Ethiopia has been piloting an electronic government procurement (EGP) system since 2021 with nine public agencies participating. In 2023 the system was expanded to 74 federal agencies including those that make the major purchases in sectors including agriculture, technology, health, and education.

Why is Ethiopia investing 300 million USD in solar energy?

She mentioned that the country's focus is on the solar energy sector, where Ethiopia is investing 300 million USD in a project aimed at generating 300 megawatts of solar energy. It does not only support the country's renewable energy goals but also contributes to reducing carbon emissions and promoting sustainability, she said.

Does Ethiopia have solar power?

According to the researches, Ethiopia is blessed with an abundance of sunlight, receiving an average of 5.5 to 6.5 kWh/m²/day throughout the year. This vast solar potential, coupled with declining costs of solar technology, provides a significant opportunity for the country to harness clean energy.

Can solar power transform Ethiopia's energy landscape?

Among these, solar energy emerges as a beacon of hope, poised to transform Ethiopia's energy landscape and drive socioeconomic development. Significantly, the country has relied heavily on hydropower, which accounts for more than 90% of its electricity generation.
