How much is a self-consumption solar and storage project worth?

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage projects, worth nearly EUR14 million. Image: Ministry of Energy. A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.

Will a government fund energy storage at wind & solar PV plants?

According to local reports, the government plans to allocate funding from the Modernisation Fund to support the deployment of energy storage at wind and solar PV plants covering 25% of the plants' output capacity.

Should you refinance a solar loan?

Although the APR seems significantly higher, the total balance of the loan is lower. These higher interest rate loans provide homeowners the greatest flexibility with their solar investment. They can refinance if rates drop in a few years, or pay off the principal balance at any time without leaving their rate buydown on the table.

Loan Options: Companies like Mosaic offer flexible financing options for energy storage systems, including standalone battery storage ...
