Will China build a 100-megawatt solar power plant in Botswana?

A Chinese consortium, led by China Harbour Engineering Company, has secured a contract to build a 100-megawatt solar power plant in Botswana. This project supports the country's revised Integrated Resource Plan, which aims for a 50% renewable energy share by 2036. Scheduled for completion in 2026, the solar plant will...

How much does a solar plant cost in Gaborone?

The solar plant, valued at US\$78.3 million (R1.4 billion), is set to be completed by the second quarter of 2026, according to Zhitong Finance. The contract signing took place on Monday in Jwaneng, which is a diamond mining town located 200 kilometers west of the capital, Gaborone.

Will China's solar project influence Botswana's energy landscape?

The project is likely to attract significant attention from both domestic and international stakeholders, given its potential to influence Botswana's energy landscape for years to come. A Chinese consortium, led by China Harbour Engineering Company, has secured a contract to build a 100-megawatt solar power plant in Botswana.

How much does Botswana's solar project cost?

The project is a key development in Botswana's renewable energy sector, marking the country's second utility-scale solar facility. The contract, which is valued at \$78.3 million, includes partnerships with China Water and Electric Development Co. and local investors.
