How do I put the batteries in the battery swapping cabinet?

Here is the complete guide on how to put the batteries in the battery swapping cabinet with a hard connection, step by step: Use the Tycorun Energy App to scan the qr code. Then you will hear the voice announcement "Please put the battery in the designated slots." The battery is returned successfully.

How do you put in a battery?

To put in batteries correctly, start by identifying the positive (+) and negative (-) terminals on both the battery and the device. For standard batteries, press the flat negative end against the spring in the compartment, then secure the positive end.

How do I replace a battery?

Turn Off the Device: Always power off the device before replacing batteries. **Open the Battery Compartment:** Access the battery holder by removing the cover or panel. **Remove Old Batteries:** If present, carefully take out the old batteries. **Inspect the Compartment:** Check for corrosion or debris and clean if necessary. **Insert New Batteries:**

How do you put a new battery in a laptop?

If you're ready to pop in those fresh batteries, read on! For AA, AAA, C, and D batteries, slide the flat, negative end of the battery against the spring onto the device. Then, push the raised, positive end into the flat side of the compartment. For a 9-Volt battery, hold it at a 30° angle to line it up with the connector snaps.
