What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

How is the EU leading the way in energy storage?

The EU has developed a forward-thinking, supportive regulatory framework to encourage energy storage deployment as part of its ambitious clean energy and climate goals. Here's how the EU is leading the way: 1. Clean Energy for All Europeans Package

What does the EU's grids package mean for energy storage?

10 December 2025 -- Today, the European Commission published the Grids Package, addressing critical bottlenecks in grid connections, permitting, and infrastructure planning. These issues have hampered energy storage deployment and slowed the EU's decarbonisation and affordability ambitions.

What is Energy Storage Regulation (EU) 2019/943?

Electricity Regulation (EU) 2019/943: Sets market rules that encourage the use of energy storage to maintain grid stability, creating a dynamic environment where storage can compete on a level playing field. 2. Battery Regulation

While politicians and the public are currently focusing primarily on grid expansion, the potential of energy storage solutions remains largely unaddressed. The Centre for ...

The Rise of Energy Storage in Europe Energy storage is becoming increasingly critical for Europe. It supports the integration of renewable energy sources, enhances grid ...
