Will changes in trade and tax policy affect energy storage projects?

Changes in trade and tax policy may increase costs and put a damper on near-term forecasted energy storage projects. On February 4, 2025, an additional 10% tariff on all goods imported from China went into effect.

Will energy storage be necessary in the future?

It is much less amenable to simple market solutions. Based on the recent Royal Society report on energy storage, the author argues that in future systems, storage will be necessary both in the short term, for example in the form of batteries to deal with day-to-day variability, and in

How can energy storage investors secure long-term revenue certainty?

Investors can undertake to secure long-term revenue certainty. Arrangements with route-to-market providers allow energy storage investors to de-risk the complex trading optimization of battery dispatch by outsourcing battery trading operations. In some arrangements, investors can secure

How can energy storage investors mitigate risk?

Investors can secure revenue certainty and portfolio diversification. Fortunately, there are several mitigation strategies that energy storage investors can resort to. Long-term stable and predictable revenues improve the bankability of energy storage projects and help investors to reduce
