How do solar panels work in Luxembourg?

To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This is the the most subsidised in Luxembourg. This system has a number of advantages: It also enables them to generate additional income.

How can Luxembourg save money on solar panels?

Luxembourg homeowners can reduce their electricity bills and sell surplus production thanks to the self-consumption model. The government is proposing subsidies covering up to 80% of installation costs with an estimated return on investment of between 5 and 7 years. How steep should the roof be for solar panels?

Are photovoltaic panels subsidised in Luxembourg?

The installation of photovoltaic panels is heavily subsidised by the Luxembourg government and local authorities. This practice is fully in line with the national objective of reducing greenhouse gas emissions (-55% by 2030). Consult our Guide to photovoltaic subsidies in Luxembourg (subsidies 2025).

Since 2019, the government has set incentives for small solar installations and they have looked into the possibility of feed-in tariffs for small PV systems. In 2019, renewable energy was able ...

The International Renewable Energy Agency is responsible for developing policies and schemes that will boost the solar energy sector. Since 2019, the government has set incentives for small ...

Solar Tracker When designing and installing a solar power system for your property, you have several unique ways to choose. But if you prefer to have a ground-mounted solar panel ...

Solar photovoltaic (PV) power generation is the process of converting energy from the sun into electricity using solar panels. Solar ...

Luxembourg solar power generation system home full set of sunlight
