What does Mauritania's new solar-wind power plant mean for the world?

Mauritania has signed its first independent power producer contract, a \$300 million agreement with Iwa Green Energy to develop a 60-megawatt hybrid solar-wind power plant. The project marks a milestone in the country's drive to expand electricity generation through private financing while accelerating its transition to renewables.

What is Mauritania's new power plant?

The project marks a milestone in the country's drive to expand electricity generation through private financing while accelerating its transition to renewables. The facility, scheduled to come onstream in September 2026, will boost Mauritania's installed capacity of about 450 megawatts.

How will Mauritania's wind power plant affect its energy mix?

The wind power plant in the northern town of Boulenouar will also significantly increase the share of the country's energy mix. The significant share of renewable energy in Mauritania's total energy portfolio is impressive, especially compared to other countries on the continent.

Who is Mauritania's first independent power producer?

Department of Communications and External Relations, [media@afdb.org](mailto:media@afdb.org) Mauritania has signed its first independent power producer contract, a \$300 million agreement with Iwa Green Energy to develop a 60-megawatt hybrid solar-wind power plant.

"The Chamber strongly supports the milestone achieved by bp, Technip Energies, Mauritania and Senegal, and commends all parties for their resilient approach to making the ...

Revised June 2025, this map illustrates energy infrastructure across Mauritania. The locations of power generation facilities that are operating, under construction or planned ...

Mauritania is a major oil supplier, exporting more than 85% of its oil production in 2013. It also has strong onshore wind power potential. However only 30% of the ...
