Is the energy strategy in Mauritius sustainable?

The energy strategies in Mauritius, which have been demand-driven without incentives to reduce demand, can no longer be sustainable. It is the duty and responsibility of the Government to work towards decreasing carbon dioxide emissions in light of environmental issues.

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

What is the sustainable island Mauritius project?

In this view, the CSCP and the Mauritius Tourism Authority collaborated on the implementation of the Sustainable Island Mauritius project (2018 - 2022). This project aimed to advance sustainable tourism in Mauritius by showcasing and scaling up self-sustaining mechanisms designed to improve sustainability impacts across value chains.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

Spain's ministry for ecological transition has allocated EUR 156.4 million (USD 164.3m) in subsidies to 45 innovative energy storage ...

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage fluctuations in renewable energy sources like solar and ...
