---

This plant directly harnesses solar energy to produce hydrogen, which is then made available at the public hydrogen refuelling station for trucks and heavy-duty applications. ...

The solar power plant is anticipated to commence commercial operations in the second quarter of 2026, significantly contributing to ...

Namibia's vast renewable energy potential holds significant opportunities for socio-economic development. Located on the Southwest Atlantic coast of Africa, with a small ...

This plant directly harnesses solar energy to produce hydrogen, which is then made available at the public hydrogen refuelling ...

The Namibia Innovation !Hub (NI!H), a national beacon of innovation dedicated to advancing innovative start-ups and entrepreneurs. NI!H empowers Namibian entrepreneurs to evolve ...

While solar energy has received the most attention in Namibia's renewable energy strategy, wind power is also an increasingly ...

The solar power plant is anticipated to commence commercial operations in the second quarter of 2026, significantly contributing to Namibia's energy mix. By harnessing solar ...

This initiative underscores Namibia's commitment to transitioning to renewable energy, fostering economic growth, and achieving sustainable development.

Plug Power recently announced it has successfully installed a 5MW GenEco electrolyzer at Cleanergy Solutions Namibia's Walvis Bay site, powering Africa's first fully ...

A notable example is the 37 MW Hardap Solar Power Plant, a joint venture between the Namibian government and private sector ...

Namibia has started building the 100-MW Sores Gaib Solar Power Plant with NamPower and TotalEnergies to boost renewable ...

This initiative underscores Namibia's commitment to transitioning to renewable energy, fostering economic growth, and ...

NamPower Breaks Ground on Namibia's Largest Solar PV Power Station. On 19 June 2025, NamPower officially commenced ...

The successful agreement, which builds on initial discussions from mid-2024, solidifies the path forward for Namibia's largest solar plant. Project Scope and Regional Impact ...

A new frontier The required infrastructure for power trading already exists. About 40% of Namibia's power currently comes from ...

Namibia has started building the 100-MW Sores Gaib Solar Power Plant with NamPower and TotalEnergies to boost renewable energy and reduce electricity imports.
