-----

WINDHOEK, Oct. 15 -- Namibia has received the first shipment of equipment for its 51-megawatt (MW) Omburu Battery Energy Storage System (BESS) project, the country's first utility-scale ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't ...

HDF Energy wants to build utility scale solar hydrogen project in Namibia The project was conceived in 2021, when Namibia initiated the Harambee Prosperity Plan II aimed at ...

Public-private forces are unlocking Namibia's solar potential by building utility-scale facilities, opening up market to renewables producers Solar energy accounted for almost 7% of the ...

Namibia Power Corporation (NamPower) has selected a Chinese team of Shandong Electrical Engineering & Equipment Group Company and Zhejiang Narada Power Source Company to ...

The utility has issued a tender for six utility-scale solar photovoltaic (PV) independent power producers (IPPs) and a separate engineering, procurement, and ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, ...

The Omburu BESS Project will be developed, owned, and operated by NamPower, where NamPower will appoint an EPC contractor to construct the BESS. The KfW Development Bank ...

It can release electricity to the grid during peak hours and provide peak shaving and stable support for

renewable energy sources such as solar and wind power. The project is ...

Does Namibia have solar irradiance? Namibia's solar irradiance levels. Nampower expects to begin construction of its four utility-scale renewable power facilities this year and bring them ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and ...

In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the ...

Namibia is moving to expand its renewable energy footprint through significant procurement initiatives announced by its state-owned utility, NamPower. The utility has issued ...

The Erongo Battery Energy Storage System, also Erongo BESS, is a planned 58 MW (78,000 hp) battery energy storage system installation in . The BESS, the first of its kind in the country and ...

The Hardap project is expected to be one of the largest solar power plants in the country, and its construction is set to create numerous ...

The storage facility will be built at the Omburu substation, an existing grid node in northern Namibia. When the BESS is connected to the grid in early 2026, it will be one of the largest ...
