---

Discover installed capacity, number of projects, and annual trends data by storage type and sector (residential, commercial, and grid-scale) for completed projects including those that did ...

The expected new installed capacity of energy storage in the region is projected to reach 3.8GW/9.6GWh in 2024, reflecting a year-on ...

Total U.S. installed battery storage capacity surpassed 39 gigawatts in 2025, a 43% increase from 2024, according to energy data portal Cleanview.

In terms of application, equipping energy storage in renewable electricity generation projects is the main application field for new type energy storage, with a cumulative installed capacity ...

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

The country's installed new-type energy storage capacity had reached 31.39 gigawatts by the end of 2023, of which 22.6 gigawatts were newly installed in that year alone, ...

The deployment of "new type" energy storage capacity almost quadrupled in 2023 in China, increasing to 31.4GW, up from just 8.7GW in 2022, according to data from the ...

The American Clean Power Association reported that the United States added a record 1,602-MW of battery storage capacity in the first quarter of 2025, equivalent to the ...

By the end of 2024, the cumulative installed and operational capacity of new energy storage projects nationwide reached 73.76 GW/168 GWh, approximately 20 times that ...

China's National Energy Administration (NEA) announced on January 23 that the country's installed capacity of new energy storage ...

In the near term, the report expects 15 GW/49 GWh of new storage capacity to be installed across all segments in 2025, with utility ...

In the near term, the report expects 15 GW/49 GWh of new storage capacity to be installed across all segments in 2025, with utility-scale installations projected to grow 22% year ...

In the United States, cumulative utility-scale battery storage capacity exceeded 26 gigawatts (GW) in 2024, according to our January 2025 Preliminary Monthly Electric ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage ...

A new report indicates that the nation's energy storage market added 12.3 GW of installed battery capacity in 2024. The latest U.S. Energy Storage Monitor report was released ...

In Q1, Indiana added 256 megawatts (MW) of new energy storage, quadrupling its total installed capacity. It now has more than 10 ...
