Phase 1 of Norway's first carbon capture and storage project, which started operations in September 2024, can store 1.5 million tonnes ...

Phase 1 of Norway's first carbon capture and storage project, which started operations in September 2024, can store 1.5 million tonnes of CO₂ annually, equal to the ...

Operations are expected to begin this summer, including the first shipment of CO₂ from Heidelberg Materials' cement factory in Brevik, Norway, to a reservoir 2,600 meters ...

South Korea's Tilda accelerates its entry into Vietnam with an artificial intelligence-based energy optimisation solution for solar and energy storage systems in the manufacturing sector.

While Norway once aimed to be the "battery of Europe" it has since been overtaken other Nordic countries Sweden and Finland for ...

Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery ...

With this project we can increase production, reservoir capacity and efficiency from our facilities in Fortun, as well as take better care of water resources with minimal ...

Technip Energies Loading Systems has been awarded a contract to supply three fully electric marine loading arms for phase 2 of ...

With this project we can increase production, reservoir capacity and efficiency from our facilities in Fortun, as well as take better ...

Industry expectations from policymakers The initiators of the Frontier Economics" study call on policymakers to ensure investment security for the development of new large ...

The project integrates CO2 capture at Heidelberg Materials" cement plant in Brevik and, by 2029, Hafslund Celsio"s waste-to-energy plant in Oslo. Captured CO2 is transported ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial ...
