---

Integration Establishes World's Largest Provider of Motion Control Technology for Utility-Scale Solar Kinematics, a global leader in intelligent motion control, today announced the successful ...

Kinematics, a U.S.-based specialist in intelligent motion control has signed a definitive agreement to acquire P4Q, a Spanish manufacturer of electronics for solar tracker ...

P4Q is a premier provider of IoT solutions, specializing in electronic devices, communication technologies, and cloud ...

P4Q is a premier provider of IoT solutions, specializing in electronic devices, communication technologies, and cloud-based monitoring for solar tracking systems, medical diagnostic ...

Transforming the Solar Tracker Landscape The completion of Kinematics' acquisition of P4Q represents a transformative moment for the solar tracker market. This ...

The mix between innovation and knowledge and leveraging P4Q's extensive experience in HW and SW development, gave birth to our Suntrack ...

Suntrack is the world leader in solar tracker controllers, with more than 1,000,000 devices delivered and over 50 GW of PV and CPV installed in 3,000 solar sites.

P4Q combines IoT, Big Data, and technology to create leading electronic devices for sectors like solar energy, healthcare... Contact us!

Suntrack is the world leader in solar tracker controllers, with more than 1,000,000 devices delivered and over 50 GW of PV and CPV installed in 3,000 solar sites.

NCU centralizes the data from the PV trackers: the positions of the axis, target and the alarms that determine if the trackers are working well

About P4Q P4Q is a premier provider of IoT solutions, specializing in electronic devices, communication ...

Suntrack provides an open and adaptive system designed to achieve a +99% tracking uptime and obtain a low LCOE. Our ecosystem consists on an extensive product and service portfolio ...

P4Q developed the First Tracker Controller of its kind and what would become the company's first branded product: Suntrack®;. Our highly ...

The Tracker Control Unit is an electric closed cabinet capable of throughly tracking the trajectory of the sun. Its use is recommended for all the usual types os potovoltaic modules.

One strategy: carefully and continually re-aiming photovoltaic solar panels throughout the day to maximize their direct exposure to the sun's rays. P4Q Electronics has emerged as the world's ...

Suntrack provides a cybersecure and adaptive system designed to achieve a +99% tracking uptime and obtain a low LCOE. Our ecosystem consists of an extensive product and service ...
