What is an IP55 rating in outdoor cabinets?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water.

What is an IP55 enclosure?

IP55 enclosures offer a balanced level of protection for outdoor telecom, electrical, and industrial equipment, providing reliable performance across most climate zones. When properly selected and equipped, they ensure long-term operational stability even in demanding conditions.

Are IPCom-group cabinets suitable for outdoor use?

They are designed to handle rain, splashes, wind-driven moisture, and general outdoor exposure within their declared operating limits. IPCOM-Group cabinets operate reliably in environments with temperatures from  $-40^{\circ}\text{C}$  to  $+40^{\circ}\text{C}$  and up to 90% air humidity, which makes them suitable for most standard climate zones.

What is an IP55 rating?

The correct IP classification directly affects the stable operation of installed equipment. One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.
