Do TEN-T ports need shore-side electricity?

AFIR mandates that by 2030,90%of all port calls by container and passenger ships at TEN-T ports must use shore-side electricity. However,accurately determining this power demand is complex due to variations in ship sizes,onboard equipment,operational profiles,and design specifications.

How much infrastructure is needed to meet EU shore power targets?

Together,these findings suggest that meeting EU shore power targets will require infrastructure capable of delivering between roughly 6 and 13 TWh annually. This clearly indicates the significant investment,planning,and coordination required.

How much shore power does the EU need to meet Afir?

Adjusting the total demand accordingly yields a policy-relevant TAM of approximately 10.6 TWh per year,which is the amount of shore power the EU would is required to supply to meet its obligations under AFIR,assuming full compliance and electrification of the relevant fleet segments.

Busiest container ports The table below lists 20 of the busiest container ports in Europe with the containers counted in TEU.
