Do distribution-connected energy storage projects need an interconnection agreement?

Yes, distribution-connected energy storage projects must have an interconnection agreement with the utility. These projects, operating like a generator, must interconnect under the Wholesale Distribution Access Tariff (WDAT), which is regulated by the Federal Energy Regulatory Commission (FERC).

What are the different types of procurement contracts?

There are three key types of procurement contracts--power purchase agreements (PPAs) or energy storage services agreements; engineering, procurement, and construction (EPC) agreements; and build-transfer agreements (BTAs)--and several key risks that must be allocated between the parties.

Should the initial procurement use an ISC agreement structure?

re. The initial procurement should use an ISC agreement structure, rather than a tolling agreement structure. An ISC agreement structure which is a contract for difference, is currently used in utility-scale renewable energy credit procurements conducted by the Illinois Power Agency (IPA) to implement the Renewable Portfolio Standard (

What does the PU's Energy Storage Procurement Framework do?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. Since the time of Assembly Bill 2514 and through 2021 California built a rich ecosystem for energy storage research and development, commercialization, and project deployment.

In evaluating the appropriate contract structures for the initial procurement of utility-scale energy storage resources, stakeholders provided insights on two primary mechanisms: indexed ...
