-----  
What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What types of enclosures are available for rail customers?

For our rail customers, our portfolio includes enclosures designed to Network Rail PA05 specification, SISS /CIS cabinets and LOCs to house telecom, signalling and switchgear equipment. Our engineering team has extensive experience working with rail projects throughout the UK.

Why should you choose Shield for your outdoor telecom enclosure?

This solution is also ideal for rapid deployment at the network edge. SHIELD offers a wide range of customization features for your outdoor telecom enclosures such as machining, special dimensions, custom colors, and additional protection for harsh environment.

Who are RISQS - rail industry supplier qualification scheme?

We have developed solutions for a variety of applications in compliance with Rail Industry standards. We are a registered supplier of the RISQS (Railway Industry Supplier Qualification Scheme), members of the Rail Alliance and operate to ISO 9001 quality management standards.
