-----

Romania's Ministry of Energy has reached two additional milestones under the National Recovery and Resilience Plan related to ...

The storage system is installed next to the Mireasa wind farm and the Galbiori solar park and will be fully connected to the grid by the ...

Paired with 3 hybrid inverters, this scalable solution provides reliable, cost-effective, and sustainable energy storage for residential and light commercial applications.

Energy storage cabinets are crucial in modern energy systems, offering versatile solutions for energy management, backup ...

The storage system is installed next to the Mireasa wind farm and the Galbiori solar park and will be fully connected to the grid by the end of 2024. Prime batteries are set to be ...

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW ...

This product is perhaps more commonly called a "solar battery box" but is also referred to as a "pole mount battery box". Some battery boxes are ...

Swiss-based MET Group strengthens its presence in the Romanian market for renewable energies, commencing the construction of its 80 MWp solar project in the Rascaeti ...

The Romanian government published new technical regulations for energy storage on Jan. 18. The secondary

regulations are ...

The storage system operates a NMC-type lithium-ion battery with a capacity of 6 MWh, produced in Romania and a total output power of 7 MW using 2 central battery inverters from SMA to ...

" [The Eurowind Energy] contract marks the most significant storage project in our portfolio and consolidates the position of our ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as ...

Enterprising companies in Romania's energy storage market have expansion, with recent announcements from two major players, Nova Power & Gas and Visual Fan, set to add ...

Romanian developer Monsson has installed a 24 MWh battery storage system as the first stage of a 216 MWh project. The storage unit ...

Battery Energy Storage Systems represent the missing link in Romania's renewable energy infrastructure. These industrial-scale batteries capture excess solar generation during ...

Prime Batteries, a company supported by InnoEnergy, and Monsson have put into operation the largest electricity storage capacity in Romania. This is part of the first hybrid ...
