-----  
How does CAG manage Changi Airport?

It also manages the Changi East development project, which includes the building of a new Terminal 5 for Changi Airport. CAG also operates Seletar Airport (IATA: XSP, ICAO: WSSL) and through its subsidiary Changi Airports International, invests in and manages airports around the world.

What infrastructure does Changi Airport have?

The infrastructure of Changi Airport includes passenger terminals, runways, taxiways, maintenance buildings and services, and ground support equipment. Its four current passenger terminals can handle 82 million passengers a year. When Terminal 5 is completed, it is expected to handle an additional 50 million passengers per year.

How much does it cost to build a Changi Airport Terminal?

It sits on the former Singapore Changi Airport Budget Terminal and cost S\$985 million and took about two years to construct. The terminal building was designed and executed primarily by Takenaka Corporation, which has constructed and renovated many buildings at Changi Airport.

Will Changi Airport have a ground transportation centre?

For the first time, T5 will see Changi Airport house a ground transportation centre, bringing together train, bus, taxi and other transport services. It will enhance Changi's connectivity to the rest of Singapore, making the airport accessible not just for travel, but also as a destination for local residents to enjoy.
