What is happening in Slovenia's energy transition?

People and communities in Slovenia's energy transition is emerging strongly. The government and local energy companies are increasingly engaging with communities through consultative processes and collaborative projects that not only address the energy needs but also

What are Slovenian characteristics and possibilities for the growth of renewables?

Slovenian characteristics and possibilities for the growth of renewables. Largest Slovenian potential has solar power, wood and water is over 90 % exploit. 1. Introduction One of the main goals of energy policy in the European Union (EU) is to gradually increase the use of renewable energy sources (RES) and also to improve energy efficiency.

What is the current energy use and state of renewables in Slovenia?

Current energy use and state of renewables in Slovenia. 2050 scenario based forecast of energy use for industry, transport and other use. Slovenian characteristics and possibilities for the growth of renewables. Largest Slovenian potential has solar power, wood and water is over 90 % exploit. 1. Introduction

Does Slovenia have a wind power plant?

The power of wind power plants (WPP) in 2019 in Slovenia was only 3.3 MW, which represents a significant deviation from the predictions of national program (Government of the RS, 2020b), which predicted it to be at 50 MW. Wind potential in Slovenia is very limited as the conditions for the operation of these plants are unfavourable.

As for the uncertainties in the field of transport - the sector needs to contribute more intensively to the transition to climate neutrality through energy efficiency, electrification, ...

The Ministry of the Environment, Climate and Energy launched a public call for cofunding under a mechanism for the modernization of energy systems in Slovenia and ...

Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy ...

In the first three days of May, most of Slovenia's electricity consumption was covered by renewable energy sources, while on 4 May 2024, the electricity generated from renewables ...

The Slovenian government has opened an investment call with a budget of EUR 29.5 million (USD 34.3m) to co-finance projects for the ...

Solar and wind power projects with or without energy storage that are on Slovenia's priority list can be submitted for grants from the European Union's Modernisation Fund. The ...

The Recovery and Resilience Plan addresses a number of challenges facing renewable energy producers and consumers in Slovenia.

Are you looking for information on renewable energy in Slovenia? In this CMS Expert Guide, we tell you everything about it.

The Slovenian government has opened an investment call with a budget of EUR 29.5 million (USD 34.3m) to co-finance projects for the adoption of wind, solar and energy ...

Slovenia's Ministry of the Environment, Climate and Energy has published an investment call to co-finance solar and wind power projects granted priority status.

That's exactly what Ljubljana's energy storage power initiative is achieving. Nestled in Slovenia's capital, this project combines cutting-edge battery tech with smart grid ...

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and ...

Slovenia has put in place a National Renewable Action Plan to 2020, which targets a 25% share of energy generation from renewable ...

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

Slovenia's Ministry of the Environment, Climate and Energy has published an investment call to co-finance solar and wind power ...

The goal of the call is to increase the share of renewable energy in Slovenia's energy mix in order to help the country reduce its dependence on fossil fuels and develop a reliable energy ...
