---

The game-changing solar and thermal hydro energy storage system developed by our partner RayGen effectively addresses this issue by ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

For commercial applications, mechanical storage options provide effective solutions to harnessing solar energy when it's needed most, and grid-scale battery storage will likely become available ...

We're developing America's solar energy and storage infrastructure, helping to increase domestic energy production ...

Grid energy storage, also known as large-scale energy storage, is a set of technologies connected to the electrical power grid that store energy for later use. These systems help balance supply and demand by storing excess electricity from variable renewables such as solar and inflexible sources like nuclear power, releasing it when needed. They further provide essential grid services, such a...

Vistra estimates it will invest over \$550 million to build the Coal to Solar & Energy Storage Act portfolio in Illinois. Pending all necessary regulatory and local approvals, Vistra intends to ...

We're developing America's solar energy and storage infrastructure, helping to increase domestic energy production to ensure the nation's energy security. In 2024, &#216;rsted was the second ...

Grid energy storage, also known as large-scale energy storage, is a set of technologies connected to the electrical power grid that store energy for later use. These systems help ...

It includes 240 battery containers and 60 units of prefabricated cabin. Once the entire project is complete, it will form an integrated ...

The world's largest battery energy storage system (BESS) so far has gone into operation in Monterey County, California, US retail ...

A new wave of large-scale solar manufacturing is emerging as advanced 300MW PV module lines gain traction across global production facilities. Known for their high efficiency, ...

Pacific Green has secured planning approval for a 1GW/2.5GWh BESS in Portland, whilst Edify Energy has received federal ...

It is the world's first large-scale CAES solution with complete independent intellectual property rights and a full industrial supply chain, designed for long-duration ...

The 300MW/1200MWh grid-forming independent energy storage project in Northwest China is the largest of its kind in the global lithium iron phosphate battery storage sector, setting a ...

Utility battery systems are large-capacity energy storage installations designed for grid-level applications. Unlike residential or ...

NYC Energy LLC is proposing to develop a utility-scale FESS of up to 300 MW/1200 MWh of energy using stacking energy storage containers and associated equipment located ...
