Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

What are hidden communication devices in solar energy equipment?

U.S. energy officials have discovered hidden communication devices in solar energy equipment supplied from China. These are primarily inverters used to connect solar panels and wind turbines to power grids, as well as batteries, heat pumps, and chargers for electric vehicles.

Are there undocumented communication devices in solar panels?

Over the past 9 months, undocumented communication devices (including cellular radios) have also been found in solar panels from several Chinese suppliers. The exact number of inverters and batteries tested, as well as the names of the suppliers, were not provided by the source.

Could Chinese government switch off inverters remotely?

That could enable the Chinese government to skirt firewalls and switch off the inverters remotely, or change their settings, destabilizing power grids, damaging energy infrastructure and triggering blackouts, the Reuters report said.

Mobile crisis units powered by emergency solar power systems represent a critical lifeline during disasters, ensuring uninterrupted ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

U.S. energy officials have discovered hidden communication devices in solar energy equipment supplied from China. These are ...

Solar-powered telecom tower systems have emerged as a game-changer for providing reliable and sustainable communication ...

U.S. energy officials have discovered hidden communication devices in solar energy equipment supplied from China. These are primarily inverters used to connect solar ...

Unfortunately, undocumented communication devices have been recovered in a multitude of different Chinese-manufactured batteries ...

The initial introduction toward the sustainable infrastructure has opened the door to realizing the new innovations in remote ...

AI-created, human-reviewed. In a shocking revelation that has sent ripples through the cybersecurity and renewable energy ...

A team of engineers in the U.S. took apart a solar power inverter. It looked like any other--sleek, compact, humming with the promise of sustainability. But buried deep inside, ...

On the side of the solar power plant monitoring system, we briefly mentioned some of the deficiencies, mistakes made and actions to be taken in the ...

In an increasingly connected world, maintaining reliable communication beyond traditional infrastructure isn't just a luxury--it's becoming essential for resilience and ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

Expert insights on installing solar-powered communication systems with integrated business intelligence and data analytics.

Learn how solar powered emergency communication gear keeps you connected during power outages or off grid. Explore radios, two-way devices, and satellite tools powered ...

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication ...
