How much does solar energy cost in Spain?

In the first quarter of 2024, the average PPA price for solar energy was EUR38.50 per megawatt-hour (MWh), positioning Spain as the most cost-effective market for solar PPAs in Europe. Wholesale electricity prices saw a significant surge throughout 2023.

How much does a PV project cost in Spain?

These have occurred during 5.5% of operating hours, with an average price of -EUR0.4/kWh and lows of -EUR2.0/kWh. Over the last two years, Spain's PV market has seen a sharp drop in project prices. "It was as abrupt as it was necessary," Carmen Izquierdo, CEO of nTeaser, a European marketplace focused on M&A of renewable projects, told pv magazine.

How does solar energy work in Spain?

Solar energy uses the sun's rays and heat to generate electricity, thermal energy (including solar water heating), and solar architecture. The Spanish solar energy market is segmented by type and deployment type. By type, it is divided into solar photovoltaic (PV) and concentrated solar power (CSP).

What happened to solar PPA prices in Spain?

In Spain, the average solar PPA price fell by 5.1% between the fourth quarter of 2024 and the first quarter of 2025. Image: BNZ.

In Spain and France, for instance, the average solar PPA price decreased by 5.1% and increased by 6.3%, respectively, from one quarter to the next.

In this article, we will explore in detail the price of solar panels in Spain and provide an up-to-date guide for those interested in installing a solar system in their homes or businesses.

Explore the current state of residential solar adoption in Spain in 2025. Learn about key challenges, incentives,

and opportunities for homeowners looking to invest in solar energy.

Declining module prices, accelerated permitting aligned with EU Fit-for-55 mandates, and strong corporate PPA appetite underpin ...

Spain leads the solar market but suffers from spills, zero prices, and grid bottlenecks. Keys, figures, and solutions for storage and self-consumption.

After a breakneck expansion that lifted solar generation by over 200% since 2019, Spain's solar installation pace looks set to slow in ...

This report provides an in-depth analysis of the rapid growth and development of photovoltaic power systems in Spain, highlighting ...

Tesla solar makes it easy to produce clean, renewable energy for your home and to take control of your energy use. Learn more about solar.

Platts has launched an "interactive explorer" tool that shows the capture price received by wind and solar power assets, using hourly ...

Renewable energy is currently experiencing substantial development in Spain. With the goal of reaching climate neutrality by ...

Discover how Spain is leading the way in solar energy adoption, with photovoltaics accounting for 21% of electricity generation.

The cost of solar power installation in Spain generally ranges between EUR4,000 and EUR12,000 for an average-sized system (1), dependent ...

Since April 1, 2024, Spain has also seen negative electricity prices. These have occurred during 5.5% of operating hours, with an ...

Photovoltaic cells have been the building blocks of a solar power boom spurred by Prime Minister Pedro Sánchez, whose support ...

The boom in solar power installations were faster than anticipated and prices for grid connected solar power were not cut to reflect this, leading to a fast but unsustainable boom in ...

In Spain and France, for instance, the average solar PPA price decreased by 5.1% and increased by 6.3%, respectively, from one ...
