Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain[News]The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

Renewable energy targets: Spain's commitment to achieving 74% renewable electricity by 2030 fuels demand for behind-the-meter storage to optimize self-consumption ...

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for ...

A consultation exercise has been opened into a plan to distribute European Regional Development Fund (ERDF) cash into large ...

This shift aligns with the EU's NIS2 directive, enhancing digital security for critical infrastructure, and positions Spain as a model for other ...

The Spanish all-in-one energy storage and charging sector is currently led by a handful of dominant players holding approximately 65% of the market share, with regional ...

The legislation aims to integrate storage into clean energy generation's regulatory framework, avoid penalizing generators who install batteries, and recognize the role of storage ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities ...

Spain has now set a national storage target of 22.5 GW by 2030, underlining its recognition that storage is essential for balancing intermittent renewable generation and ...

The Spanish government made a significant advancement in energy storage policy by approving Royal Decree 7/2025 on June 24, which addresses multiple longstanding ...

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. ...

New regulations in Spain require energy efficiency certificates for all homes by 2033. Discover the opportunities for property renovations.

The new law aims to accelerate Spain's transition to renewable energy by simplifying the process for connecting new projects to the grid. By providing a clear and ...

Adding a capacity market into the mix would only increase Spain's attractiveness for energy storage investment. In the UK, the National Grid's capacity market auctions were ...

Major Breakthrough in Spain's Energy Storage Policy: Energy Storage Explicitly Classified as "Public Utility" The Spanish government ...

Spain's government is expected to mandate stronger grid support requirements for renewables, such as voltage/frequency ride-through capabilities and even co-located energy ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will ...
