How will Spain increase its energy storage capacity?

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain[News]The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It ...

Energy storage has become a key piece of the electrical future in Spain, amidst the advance of renewable energies and the progressive withdrawal of nuclear generation.

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to

address the challenge of the energy ...

Jon Ander Lopez Ibarra, product manager for battery energy storage systems (BESS) at Spanish power conversion system company ...

The net production of non-renewable and non-Hydro Management Unit (HMU) facilities is net of their own consumption. In these types of production, negative generation ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities ...

Spain's battery storage program expanded to EUR840M, funding 143 projects totaling 8.9GWh. Learn how this initiative creates opportunities for solar-storage hybrids and boosts ...

Energy storage has become a key piece of the electrical future in Spain, amidst the advance of renewable energies and the progressive ...

This work studies the potential of hydrogen production from surplus electricity, in line with Spain's ambitious decarbonization goals. By simulating t...

Further, it is considered that the existence of a high capacity interconnection, the use of biomass power plants, hydrogen production, and a balanced energy mix, are elements ...

Spain's Ministry for the Ecological Transition and the Demographic Challenge (MITECO) has announced a major funding initiative worth EUR700 million to boost large-scale ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will ...

The exact causes of the dramatic blackout in Spain and Portugal are not yet known. But the lack of battery storage left its high ...

Find out all about how Iberdrola España is revolutionising energy storage with advanced solutions for a future of sustainable energy in Spain.

Spain's Instituto para la Diversificación y Ahorro de la Energía (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

Spain has taken a decisive step in strengthening its energy infrastructure with the launch of a EUR700 million

Spanish energy storage power production
