Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in ...

With 75% of its electricity already from renewables*, the Swiss now face a "good problem": how to store all that clean energy when the Alps aren't windy and Lake Geneva isn't ...

This makes the sector attractive both in the short and long term - a fact underscored last week at the second Solar & Storage Live trade fair in Zurich. Below is a brief ...

Swiss Clean Battery AG, based in Frauenfeld, is implementing one of the first series production plants for solid-state batteries in Europe We have the only exclusive license to date for mass ...

How can excess electricity produced by the sun and wind be prevented from being lost? A gravity battery developed in Switzerland ...

With the Zurich Energy Storage Project 2024, the country takes another leap toward achieving its 2050 net-zero targets. This project focuses on large-scale battery storage systems designed to ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

Switzerland is expanding rules for rooftop solar, energy storage, and energy communities to expand self-consumption and ease ...

Swiss construction group Erne this week announced it was entering into a strategic partnership with FlexBase Group for the ...

Protection for photovoltaic installations: grid-connected and solar thermal systems. Insurance for geothermal probes and heat pumps.

Zurich Airport is testing out an innovative new way to make solar power: vertical solar fences. The Swiss airport, which already uses rooftop solar panels, has now installed ...

Zurich North America offers expert renewable energy insurance with flexible program structures. Protect your project assets with comprehensive risk ...

The frustrating gap between sunshine abundance and solar battery cabinets accessibility. While global PV installations grew 35% year-over-year in 2023, energy waste from inadequate ...

Energy storage innovation in Switzerland: a potential to compensate renewable energy fluctuations For the first time, a pilot ...

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

What is a battery storage system used for? A battery storage system is primarily used to balance out the power supply from renewable energies. ...
