Our cooperation with ACWA Power--a global leader in renewable energy and water desalination--marks a significant step towards securing Syria's energy future through power ...

The project represents the first major integrated public-private partnership in Syria's energy sector, highlighting the country's investment ...

The rehabilitation of Syria's energy sector has emerged as a top priority for the Syrian Transitional Government (STG) as it works to ...

The agreement includes a comprehensive review of Syria's existing power infrastructure and national grid capacity. ACWA Power will collaborate with the ministry to identify optimal project ...

Syria's energy sector is undergoing a quiet transformation. With increasing demand for stable power supply and renewable energy integration, lithium battery storage projects have emerged ...

Compressed-air-energy storage (CAES) is a way to store energy for later use using compressed air. At a utility scale, energy generated during periods of low demand can be released during ...

The agreement provides a framework for conducting detailed technical and commercial studies on existing power plants and the national grid, as well as evaluating and implementing a pipeline ...

In June 2025, Syria signed a US\$7bn agreement with a consortium from Qatar, Turkey, and the United States to rebuild its power sector, including four gas-fired power plants ...

According to Power Technology, Syria recently reached a \$7 billion agreement with a consortium consisting

of Qatar, Turkey and the United States to develop a 5 GW gas and solar project, ...

Syria is facing a serious power shortage, and solar energy has become the key to solving this problem, especially the outstanding advantages of solar power systems in off-grid ...

From iron-air batteries to molten salt storage, a new wave of energy storage solutions is set to unlock resilience for tomorrow's grid.

How was the Reventaz's hydropower project financed? This renewable transition was accomplished in part through the development of the Reventaz's hydropower project, the ...

The agreement establishes a framework to perform detailed technical and commercial studies on existing power plants and the national grid, and to evaluate, develop, ...

The agreement establishes a framework to perform detailed technical and commercial studies on existing power plants and the ...

The Government of Syria has announced a 100 MW solar power generation project in the country under a contract with the Syrian ...

The project represents the first major integrated public-private partnership in Syria's energy sector, highlighting the country's investment potential and ability to attract international ...
