---

Before the war, "green" electricity in Ukraine was generated by 34 wind power plants. Ukrainian wind power plants as of the end of 2021 The gas ...

On 19 December 2025, the UWEA held its annual press conference at Interfax-Ukraine titled "Wind & Storage in 2025: A Year of New Decisions, ...

By the end of 2017, 505 MW of wind power plants had been launched in Ukraine, with 138 MW remaining in the occupied territory of Donetsk and Luhansk regions, and another 87.8 MW left ...

According to UWEA, Ukraine has 1.9 GW of installed wind capacity, with 69% located in temporarily occupied territories. Konechenkov said Ukraine's renewable energy strategy aims ...

At the Ukrainian Wind Energy Forum-2025, Yuriy Shafarenko, a representative from the Office of the President, reported that 1,300 MW of Ukraine's 1,947 MW of wind ...

Ukraine has rebuilt an energy grid that's more resilient -- and greener -- than what it had before Russia's invasion.

During the full-scale war in Ukraine, three wind power plants with a capacity of almost 230 MW have been built, and another 58 projects are at various stages of implementation.

Explore how 8 solar and wind energy projects are transforming Ukraine's future amid conflict, showcasing resilience and innovation in renewable energy.

Despite the full-scale war, Ukrainian companies continue to develop wind power capacity, deploy solar technologies and build battery energy storage systems (BESS), laying ...

The unit capacity of wind turbines installed at industrial wind farms in Ukraine ranges from 3 MW to 6 MW. The sector of small-scale wind power ...

One of the key results of the third quarter was the update of the UWEA Statute. The Association's activities now also cover energy storage systems (ESS) and distributed ...

Wind energy storage solutions are vital for optimizing energy use, but which methods truly maximize efficiency and reliability? ...

? In order to develop Ukraine's power system, it is necessary to build another 5 GW of wind - national TSO In his interview to Independent Commodity ...

Ukraine's energy infrastructure was designed in a time when energy systems were centralized and built for geopolitical purposes rather than efficiency. The Soviet-era model ...

On 19 December 2025, the UWEA held its annual press conference at Interfax-Ukraine titled "Wind & Storage in 2025: A Year of New Decisions, Challenges, and Growth", dedicated to ...

Regulation of frequency and voltage: Stable grid connection and reduction of fluctuations. In exceptional circumstances like Ukraine, industrial-grade energy storage ...
