California and Texas lead in terms of installed utility-scale storage due to their supportive state policies and the substantial solar and wind capacities that storage systems ...

Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

States define, count and report energy storage targets and procurement information differently. We have done our best to resolve these differences within this table, but some discrepancies ...

According to Wood Mackenzie, there is 83 GWh of installed energy storage capacity in the United States, including nearly 500,000 distributed storage installations. ...

The Solar Energy Industries Association (SEIA) has announced a target of 700 gigawatt-hours (GWh) of total installed battery ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

Despite the effect of COVID-19 on the energy storage industry in 2020, internal industry drivers, external policies, carbon neutralization ...

Distributed energy resources, or DER, are small-scale energy systems that power a nearby location. DER can be connected to electric grids or isolated.

Based on interconnection data and data collected by NYSERDA's Retail and Bulk Energy Storage incentive

programs, this map represents the installed energy storage capacity, number of ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical ...

View data on all the projects approved by NYSERDA's Retail and Bulk Energy Storage incentive programs. Data includes completed projects as well as projects that have been approved for ...

Unlocking the Potential of Distributed Energy Resources - Analysis and key findings. A report by the International Energy Agency.

The City University of New York formed the Smart Distributed Generation Hub (Smart DG Hub) to develop a strategic pathway to a more resilient distributed energy system, and is supported by ...

China's energy storage market focuses more on the construction of large-scale energy storage projects on the grid side, as well as the distribution and storage application of ...

Given the significant interest in distributed resources and the increased cost-effectiveness of energy storage, ERCOT is actively working with stakeholders to ...

Deployment of Energy Storage in RELAC Countries series which included workshops, in-person trainings, and technical support, to help countries to build their technical awareness for energy ...
